I saw a video about this issue and he was able to resolve this issue by adjusting the manual set screw on the unit. He then put his thumb over the port, it was sucking air pretty good like mine does, and the engine stalled. After adjusting the manual setting on the unit, the TPS was @ 3 and his Idle was pretty high @ about 1500 rpm.

The is an introduction to tuning with a programmable electronic fuel injection ECU. It is written specifically for MegaSquirt ® or MegaSquirt-II™ EFI users who are new to tuning engine with a programmable controller, and tries to make very few assumptions about what you already know. Read this document before reading the applicable tuning section for those controllers, which are here:

Principles of Tuning Programmable EFI

Yes, this range comes with an LP conversion kit and the oven is gas. The conversion instructions are located in the wiring diagram (mini-manual) and are included with the LP kit attached to the appliance near the pressure regulator. We recommend a qualified installer or servicer convert the gas range to the proper gas supply needed.
