AVCHD (Advanced Video Coding High Definition) is a file-  
based format for the digital recording and playback of high-  
definition video. It is H.264 and Dolby AC-3 packaged into the  
MPEG transport stream, with a set of constraints designed  
around the camcorders. Developed jointly by Sony and  
Panasonic, the format was introduced in 2006 primarily for  
use in high definition consumer camcorders.
