The K-12 practices described in this chapter are derived from those that scientists and engineers actually engage in as part of their work. We recognize that students cannot reach the level of competence of professional scientists and engineers, any more than a novice violinist is expected to attain the abilities of a virtuoso.

The different senses tell us that there is something sweet, red, even, with a nice smell. And while common sense ( *koinê aisthêsis* ) can distinguish the different impressions of the special senses, only opinion ( *doxa* ) is capable of saying that the object there on the table is an apple.

Proclus (Stanford Encyclopedia of Philosophy)

Chapter Summary. This chapter focuses on the role of music in early childhood, including the importance of musical experience in early childhood, the musical abilities and enjoyment of infants and children, and the vocal ranges of the young child. It also explores musical activities and repertoires appropriate for young children.
