In this video we will demonstrate practical CNC wood joinery (practical meaning that there will be no need for special jigs). The material will be 3/4" sheet stock and the parts will be milled using a 3 axis CNC machine (Our greenBull). We will start with a simple joint, a finger joint. This joint - as it's name implies - is a joint that exhibits protrusions that measure the thickness of the wood, so that when put together, the corner is flush.
