Where Did the Towers Go? is a work, assuming that its content and message are properly and fairly heeded, that offers a starting point from which those who genuinely want to do it can begin, first, to rein in and then, perhaps, even end the wanton criminality and destructiveness of a set of American policies that took as their justification and starting point the horrific events of September 11, 2001.

Foreword – Where Did the Towers Go? – Dr Judy Wood

Myles also does a decent job of explaining why Wood's claims about the Towers being "dustified" is total bollocks. Wood apparently presents this photo of Ground Zero to demonstrate the supposed lack of steel debris at the site. Myles counters by pointing out that Wood never spoke with a single first-responder or member of the clean-up crew.

Late in 2018, Viziv Technologies (formerly Texzon) completed a tower off of I-35 near Milford, Texas. With its lattice-style structural supports and bulbous top, it bears a distinct resemblance to Nikola Tesla's Wardenclyffe Tower (or Tesla Tower), an ill-fated power project envisioned by the famous physicist-engineer in the early 20th century.
