Active learning improves student outcomes. There is a well-established evidence base supporting the use of active learning. The benefits to using such activities are many, including improved critical thinking skills, increased retention and transfer of new information, increased motivation, improved interpersonal skills, and decreased course failure (Prince, 2004).

The COVID-19 pandemic paralyzed education systems worldwide; at one point, school closures forced over 1.6 billion learners out of classrooms. While smaller in scale, widespread school closures are not unique to COVID-19: teacher strikes, summer breaks, earthquakes, viruses such as influenza and Ebola, and weather-related events cause schools to close. Closures result in large learning [...]
