The fake engine noise is just several different low frequency tones that compliment the exhaust at certain rpms, the Cobb tunes will play those tones when

Get Free Ford Mustang Engine

Noise switching maps on the 15 to 17 models. When adding a subwoofer those tones get drastically amplified and played through the woofer so disabling them becomes mandatory.

How do I know I have the fake engine noise on the ecoboost ...

The reason was the

Get Free Ford Mustang Engine

Noise of the wrong head gasket belonged to the Ford Mustang engine. This 2.3l EcoBoost engine has a similar design but the coolant passages are different, which requires head gaskets unique to each engine. Also worth noting, that Mustang didn't have the problem with coolant leakage through a head gasket.
