HAAS VF-SERIES SERVICE MANUAL Pdf Download | ManualsLib

The Haas high-performance Super-Speed vertical machining centers provide the high spindle speeds, fast rapids, and quick tool changes necessary for high-volume production and reduced cycle times. Each SS machine features a 12,000-rpm, inline direct-drive spindle, an ultra-fast side-mount tool changer, and high-speed rapids on all axes.

VF-3SS | 40-Taper Mill | Super Speed - Haas Automation

Every VF Series vertical machining center provides outstanding features at an excellent price, and features a wide range of available options to customize your machine to your exact needs. All Haas machines are designed and built in Oxnard, California, USA. The VF-2 is our most popular model, and the workhorse of any shop.

VF-2 | 40-Taper Mill | Vertical Mills – Haas CNC Machines

Change my mind.. Buying a 1996 VF-6 with a 5 axis trunnion not sure what model the 5th is but it takes up at least a 3/4 of the table so its a decent size. I've heard a lot of people say stay away from anything past 98 because of the vector drive upgrade that came in 98. But I've also heard people saying don't buy past an 08 so you know.

Haas VF-6 CT40 15hp and 5 axis Trunnion

I'm looking at buying a used 2015 VF-2. To me who doesn't have experience with Haas machines, the past gen machine and the new one look identical. I know 2020 machines are adding a touchscreen now, but apart from that what are some tell tale signs that the controller is a 2015+ compared to a 2014 and older?
