The Color of Water Wikipedia

The color of water varies with the ambient conditions in which that water is present. While relatively small quantities of water appear to be colorless, pure water has a slight blue color that becomes a deeper blue as the thickness of the observed sample increases. The blue hue of water is an intrinsic property and is caused by selective absorption and scattering of white light.

color of water. Period 7 6/7/13 Title In The Color of Water James struggles with his sense of identity through childhood because he grew up in an environment void of identity; his mother runs from her own identity, so James cannot find his own. By alternating points of view between James and his mother each chapter, James McBride shows that discovering the identity of his mother was just as important as discovering his own identity; without finding his mother he could not have found himself.
