The expansion of the universe is the increase in distance between any two given gravitationally unbound parts of the observable universe with time. It is an intrinsic expansion whereby the scale of space itself changes. The universe does not expand "into" anything and does not require space to exist "outside" it. Technically, neither space nor objects in space move.

Very small kitchen with an island bench. Oven under cooktop, overhead cupboards. Note that there is very little cupboard space for both dinnerware, glasses etc and food storage in this layout. 2400mm x 3900mm Similar to the previous layout except there is now room for a dedicated pantry. The pantry could also house the microwave.
