Web Applications
PacktPublishing/Node.js_Design_Patterns_Second ...

Node.js uses the concept of a module as a fundamental means to structure the code of a program. It is the building block for creating applications and reusable libraries called packages (a package is also frequently referred to as a module since, usually, it has one single module as an entry point). In Node.js, one of the most evangelized principles is to design small modules, not only in ...
