Editor's Notes. July 23, 2020: Since we already had tried-and-tested, comprehensive high school texts like McDougal Littell Geometry and Glencoe Geometry Student Edition on board, we felt we could part ways with Holt Geometry. We added another challenging volume to balance out our selection, which features titles for struggling students, introductory texts, and more rigorous options.

Often when solving linear equations we will need to work with an equation with fraction coefficients. We can solve these problems as we have in the past. This is demonstrated in our next example. Example 1. $3/4x - 7/2 = 5/6$

Focus on subtraction $+ 7/2 + 7/2$ Add $7/2$ to both sides Notice we will need to get a common denominator to add $5/6 + 7/2$.
