GENie (General Electric Network for Information Exchange) was an online service created by a General Electric business, GEIS (now GXS), that ran from 1985 through the end of 1999. In 1994, GENie claimed around 350,000 users. Peak simultaneous usage was around 10,000 users. It was one of the pioneering services in the field, though eventually replaced by the World Wide Web and graphics-based ...

This free online textbook (OER more formally) is a course in undergraduate real analysis (somewhere it is called "advanced calculus"). The book is meant both for a basic course for students who do not necessarily wish to go to graduate school, but also as a more advanced course that also covers topics such as metric spaces and should prepare students for graduate study.

## Basic Analysis: Introduction to Real Analysis

In mathematics, a function is a binary relation between two sets that associates to each element of the first set exactly one element of the second set. Typical examples are functions from integers to integers, or from the real numbers to real numbers.. Functions were originally the idealization of how a varying quantity depends on another quantity. For example, the position of a planet is a ...
