Sun, Wind, and Light: Architectural Design Strategies ...

Sustainable architecture is architecture that seeks to minimize the negative environmental impact of buildings by efficiency and moderation in the use of materials, energy, development space and the ecosystem at large.

Sustainable architecture uses a conscious approach to energy and ecological conservation in the design of the built environment.

cool with the wind, light with the sky, and move into the future using on-site renewable resources. Developed for rapid use during schematic design, this book clarifies relationships between form and energy and gives designers tools for designing sustainably.

Sun, Wind & Light: Architectural Design Strategies by G.Z ...

Passive cooling is a building design approach that focuses on heat gain control and heat dissipation in a building in order to improve the indoor thermal comfort with low or no energy consumption. This approach works either by preventing heat from entering the interior (heat gain prevention) or by removing heat from the building (natural cooling). ...
